SUMMARY

Engineer with a graphic design background. I build accessible, responsive web interfaces that balance technical implementation with visual quality.

EXPERIENCE

Palantir.net | Engineer | June 2021 - June 2025

Frontend Development & Theming

- Developed reusable components and themed user interfaces using Twig and Drupal Site Studio on client-facing projects
- Implemented custom interactivity using JavaScript and enhanced UI behavior with React for internal applications
- Delivered responsive, accessible interfaces aligned with design specs, resolving design bugs and QA issues across multiple projects

Backend Development & Data Integration

- Contributed to the development and maintenance of a custom PHP-based data import pipeline, ingesting structured data from external sources into Drupal
- Used Drupal hooks, Drush commands, and view configuration to extend CMS functionality and support complex content needs
- Applied Xdebug and Behat for debugging and automated testing of backend logic and import processes

Cross-Functional Collaboration

- Participated in sprint planning, backlog grooming, and ticket definition with product owners and developers to ensure clear scope and technical feasibility
- Regularly demoed project work, such as component theming and data integration, to clients and internal teams, translating technical details into accessible language
- Maintained and contributed to team documentation and event modeling to improve developer onboarding and long-term code maintainability

Professional Growth & Agile Practices

- Grew from junior to mid-level by proactively taking on challenging work across the stack and adopting unfamiliar technologies as needed
- Demonstrated adaptability and initiative by shifting focus to high-priority tasks (e.g., bug fixes) or choosing project continuity for team benefit
- Practiced servant leadership by staying open to feedback, seeking mentorship, and contributing to a positive, self-directed team culture

Infosys | Associate Software Engineer | Nov 2019 - Jun 2021

- Completed intensive training in Big Data technologies and Hadoop Ecosystem (Hive, Sqoop, MapReduce)
- Developed PySpark scripts for data transformation and tested AWS services (EMR, Redshift, S3)
- Designed and built Flask and PHP web applications for Hadoop access and Spark job execution

L&L Wings, Inc. | Graphic Designer | May 2017 - Dec 2018

- Managed and produced diverse design deliverables, including logos for 10+ brands, merchandise packaging, and promotional ads
- Developed marketing materials and produced product catalogs

Face Off Unlimited | Freelance Graphic Designer | Apr 2017 - Feb 2018

- Designed print deliverables (posters, flyers, T-shirts) and digital assets (brochures, banners) for web and email

TECHNICAL SKILLS

Frontend: React, Angular, JavaScript, TypeScript, HTML/CSS, Tailwind, SCSS, Storybook

Backend, CMS & Data: PHP, Drupal, Firebase, RESTful APIs

Design: Figma, Affinity Designer, Adobe Creative Suite

Testing & Tools: Git, Jest, Lighthouse, Behat, Postman, Drush

EDUCATION

Pratt Institute | BFA Communications Design | 2012-2017 | Brooklyn, NY

Flatiron School | Software Engineering Immersive | Dec 2018 - Mar 2019 | New York, NY

General Assembly | UX Design Part-Time Course | May 2018 - July 2018 | New York, NY
