education

Flatiron School
Dec 2018 - Mar 2019
Software Engineering
Immersive
NEW YORK, NY

General Assembly
May 2018 - Jul 2018
UX Design Part-Time Course
NEW YORK, NY

Pratt Institute
2012-2014, 2015-2017 BFA
Communications Design
(Graphic Design Emphasis)
BROOKLYN, NY

tools

FRONTEND & THEMING
- React, Angular
- JavaScript, Typescript
- Tailwind
- HTML, CSS
- Storybook

BACKEND, CMS & DATA
- PHP
- Drupal
- Firebase
- Restful API's

DESIGN
- Figma
- Affinity Designer
- Adobe Creative Suite

WORKFLOW
- Git
- Lighthouse
- Behat
- Postman
- Drush

bio

Design engineer with a focus on building efficient, maintainable systems. I optimize performance and craft clean interfaces that deliver intuitive user experiences.

experience

Palantir.net (Jun 2021 - May 2025)
Engineer
- Frontend Development & Theming
  - Developed reusable components and themed user interfaces using Twig and Drupal Site Studio on client-facing projects
  - Implemented custom interactivity using JavaScript and enhanced UI behavior with React for internal applications
  - Delivered responsive, accessible interfaces aligned with design specs, resolving design bugs and QA issues across multiple projects
- Backend Development & Data Integration
  - Built and maintained a custom PHP-based data import pipeline, ingesting structured data from external sources into Drupal
  - Used Drupal hooks, Drush commands, and view configuration to extend CMS functionality and support complex content needs
  - Applied Xdebug and Behat for debugging and automated testing of backend logic and import processes
- Cross-Functional Collaboration
  - Participated in sprint planning, backlog grooming, and ticket definition with product owners and developers to ensure clear scope and technical feasibility
  - Regularly demoed project work—such as component theming and data integration—to internal teams and clients, translating technical details into accessible language
  - Maintained and contributed to team documentation and event modeling to improve developer onboarding and long-term code maintainability
- Professional Growth & Agile Practices
  - Grew from junior to mid-level by proactively taking on challenging work across the stack and adopting unfamiliar technologies as needed
  - Demonstrated adaptability and initiative by shifting focus to high-priority tasks (e.g., bug fixes) or choosing project continuity for team benefit
  - Practiced servant leadership by staying open to feedback, seeking mentorship, and contributing to a positive, self-directed team culture

Infosys (Nov 2019 - Jun 2021)
Associate Software Engineer
- Completed intensive training in Big Data technologies and Hadoop Ecosystem (Hive, Sqoop, MapReduce)
- Developed PySpark scripts for data transformation and tested AWS services (EMR, Redshift, S3)
- Designed and built Flask and PHP web applications for Hadoop access and Spark job execution

L&L Wings, Inc. (May 2017 - Dec 2018)
Graphic Designer
- Managed and produced diverse design deliverables, including logos for 10+ brands, merchandise packaging, and promotional ads
- Developed marketing materials and produced product catalogs

Face Off Unlimited (Apr 2017 - Feb 2018)
Freelance Graphic Designer
- Designed print deliverables (posters, flyers, T-shirts) and digital assets (brochures, banners) for web and email
